

# Adashi

## THE ADASHI SYSTEMS SUITE OF PRODUCTS

The Adashi Systems suite of products is the first and one-of-a-kind framework for coordinated, intelligent response. The Adashi Systems platform is specifically designed for public safety organizations to improve the staffing, notification, response, management, and reporting of critical incidents. Each product is supported by a user-friendly, intuitive interface to improve communication and effectiveness. The Adashi products seamlessly work together, giving public safety organizations an end-to-end tool. From beginning to end, we keep your information secure and ensure that it is recorded and transferred to the appropriate system. Use Adashi to make your department as safe, efficient, and organized as possible.

## Adashi FirstResponse MDT

Adashi FirstResponse MDT gets you on scene faster with all the critical information needed in the field. Direct interface with computer automated dispatch (CAD) auto-triggers a premiere navigation system along with relevant pre-plans, hydrants, detailed incident guidance, hazmat modeling, checklists, and more. Dispatch details appear in a clear, customizable display while AVL tracks and conveys the response unit's position and status.

- › Locally-stored Pre-plans
- › Navigation and AVL
- › Incident Action Plans
- › Hazard Identification Tools
- › Sensor Detection & Tracking
- › Aerial Dispersion Modeling
- › Pictometry Interface and Spatial Analysis Tools
- › Secure Team Communications
- › Easy CAD Integration
- › Web Independent - Internet Not Required

## Adashi C&C

Adashi C&C is an interactive data dashboard assisting the commander in effective decision-making. Adashi C&C features real-time collaboration, tactical planning, tracking, quick-touch resource management, and reporting tools along with map-based management. Commanders can view, place resources, and draw directly on maps, and share tactical instructions for real-time situational awareness and a common operating picture.

- › ESRI Maps Compatible
- › Navteq Street Maps Included
- › Real-time Weather Integration
- › CAD Integration
- › RMS Integration
- › Intuitive Touch-Screen Interface
- › Real-time Logging of All Activities
- › After Incident Reporting
- › Enterprise Platform
- › Web Independent - Internet Not Required

## About Adashi

Adashi is a leading provider of technology to emergency response agencies worldwide. Our team has many years of experience in the public safety industry, and our products are specifically-designed to help first responders. From before the start of a 9-1-1 call, Adashi's software optimizes public safety staffing, response, and command until the fire is contained, the terrorists apprehended, and the medical condition stabilized.
