Powerful Features

All-Inclusive – Cloud-Based

Adashi RollCall is an all-inclusive cloud based application that will work with any modern web browser or device — iOS and Android. No hidden costs, no hardware to buy and maintain.

Targeted Staffing Levels

All leave, absences, and shift changes are monitored and any shortfall is automatically flagged.

Automated Overtime Hiring

Hire replacements automatically based on your rules.

Time Management

Track vacation hours, sick hours, Kelly days, FMLA, and more. Let first responders track and request sick and vacation time directly from the app.

Sickness and Absences

Absence is recorded together with the specific reason, showing any long term patterns.

Completely Responsive

Manage multiple rosters from anywhere on virtually any device. Simply sign into your account and go.

Overtime

You can control both planned and unplanned overtime and can include differential pay rates, such as weekend or public holiday rates. Receive warning if you are about to breach your overtime limits.

Control Labor Costs

Create schedules based on demand and employee preferences, reduce overstaffing, and improve productivity.

Payroll Interface

Adashi RollCall will interface seamlessly with your existing payroll system.

Vacation Picker/Scheduling

Allows employees choice of vacations based on seniority or other established parameters while taking into consideration targeted staffing levels and department policies.

Notifications

Notify employees of open shift and overtime availability via push notifications on iOS and Android apps or text messages. Phone-based notification is available as an option.

Communications

Built-in communication tools allow you to contact all employees or groups of employees. Audit trail built in for record keeping.

Integration with Third-Party CAD and RMS solutions

Automatic and on-demand transfer of roster data eliminating redundant data entry and ensuring accuracy.

Integration with MDT and Incident Command Software

Automatic transfer of roster data and qualifications to Adashi MDT and Command and Control software for accountability.

Integration with Third-Party HR and Payroll Solutions

Built-in Activity and Payroll report can be exported into text, Excel, and PDF formats. Exports include employee information, activity codes and hours, accrual balances, and more, eliminating redundant data entry and improving accuracy.

For the Department Chief

- > Get real-time views of staffing
- > Extensive labor and management reports
- > Minimize compliance risk
- > Control labor costs
- > Track employee certifications and qualifications
- > Supports union or business rules for various departments and groups

For the Shift Commander

- > Real-time views of staffing for each battalion/dept
- > Ensure daily staffing and assignments are completed in a timely and effective manner
- > Automatically assigns overtime positions based on rules, reducing risk of noncompliance
- > Automatically validates staffing decisions
- > Identify and avoid understaffing or overstaffing
- > Approve requests for vacation, sick days, or trades
- > Create daily roster for export to RMS and payroll

For the First Responder

- > Self-serve access via web or apps
- > Sign up for voluntary overtime
- > Notifications of overtime shifts via iOS and Android apps
- > Conduct shift trades via web or apps
- > Access to personal history and real-time activity and accrual information
