

Adashi

Incident Management Solutions for
Intelligent Coordinated Fire Response

Mission-Critical Information and Accountability

Fire incident management requires a seamless coordination of resources, personnel, and equipment to respond to emergencies swiftly and effectively. By leveraging the latest technologies and strategies, firefighters can ensure the safety of both themselves and the public they serve.

From staffing to incident response, on-scene incident management to situational awareness, having key data at your fingertips can make all the difference.

Adashi provides tightly integrated applications that enable agencies to make informed and intelligent decisions during every step of an incident response.

Adashi

Providing mission-critical data while focusing on accountability with robust integrations

Adopted by agencies worldwide, Adashi offers a complete software platform to manage every stage of response by utilizing key integrations for staffing, SCBA air monitoring, PAR checks, notifications, mapping, and more.

Partnered with 3M™ Scott™ for SCBA telemetry data and L3Harris™ for digital PAR checks, situational awareness and personnel accountability are readily available with the tap of a button.

Whether you're pre-planning, working an incident or in-station, enhance your situational awareness with Adashi's end-to-end incident management platform.

Integrated Modules Help Eliminate Single Points of Failure

Bring efficiency to your daily workflow at every step

Staffing

Incident Command & Accountability

Adashi Command & Control

Situational Awareness

Adashi Alert/LiveView

Improve Accountability

Enhance situational awareness and first responder safety by leveraging streamlined data

Staffing

Know who is responding to incidents and meet apparatus staffing targets by assigning personnel to seats

Safety

Ease decision-making and personnel accountability with robust integrations, such as 3M™ Scott™ SCBA and L3Harris™ radios

Availability

Build a dynamic staffing roster with decision validation, notifications, and cross-platform interfacing

Modernize Processes

Efficiently manage department workflows and reduce administrative burden

Data Dashboard

Digitally leverage key information such as preplans, maps, staffing, CAMEO data, and more

Streamline Communications

Share information seamlessly; internally with platform interfacing and externally with personnel notifications

Stay On Task

Create, upload, and access dynamic tactical worksheets, checklists and standard operating procedures and guidelines

Adashi RollCall

A comprehensive enterprise-level solution for first responder staff scheduling and overtime management

Actionable Personnel Data

Export daily rosters for RMS and payroll or interface directly within the Adashi platform for real-time personnel accountability

Configurable

Meet scheduling goals using department and union rules with automatic flagging for missed staffing targets

Reduce Admin Burden

Simplify overtime offers, notify personnel of open shifts, and track absences

Adashi FirstResponse

Digitally access mission-critical data in one central location for a coordinated and intelligent response

Dynamic Interface

Designed for mobile response for the fire service with clean design, large buttons, and no screen-scrolling

Digital Dashboard

View key data such as preplans, CAD notes, maps, standard operating guidelines, incident action plans, and more

Incident Notifications

Receive high-priority, full-screen alerts of assigned incidents with a detailed summary of dispatch information

Adashi Command & Control

Intelligent command software for real-time incident management and collaboration

Interactive Interoperability

Collaborate with multiple officers and/or agencies to effectively manage an incident on-scene or remotely

Firefighter Accountability

Assign personnel to units, monitor air levels, and run digital PAR checks

Efficient Management

Stay on task with incident-type-specific benchmarks and checklists, automatic action logging, task reminders, and incident playback

Adashi Alert/LiveView

An in-station digital incident dashboard for enhanced situational awareness

Real-Time Alerts

Directly connected with CAD to notify stations of new incidents and display active calls

Common Operating Picture

Configurable to receive notifications for your station, department, or geographical region

Improve Response Times

Displays key incident and unit information and a turnout timer

VERSATERM PUBLIC SAFETY

About Us

Adashi Systems, a Versaterm Public Safety company, was founded in 2004 to create public safety solutions for Hazmat teams before developing into an end-to-end solution for emergency services organizations worldwide. Our complete platform gives agencies the tools to staff, respond to, and manage critical incidents safely and efficiently. The integrated modules help eliminate single points of failure and enhance responder accountability. Visit adashi.com.

Versaterm Public Safety is a global public safety solutions company helping agencies transform their organizations to meet tomorrow's mission-critical and community needs today. Formed in 1977, our dedication to public safety is demonstrated by an unwavering commitment to customer satisfaction and outcomes powered by innovative solutions developed with innovative technologies.
